

HEPAVELA®

High Protection & Lifelong Health

Alternative solution to support liver ailments...

What is Hepavela ? What benefits does it have ?

Hepavela is a treatment-supporting additive used in liver disorders due to various factors. Thanks to the rich plant extracts, vitamins and provitamins in its content;

- ✓ Silybum Marianum (Milk thistle extract) protects the liver from toxins caused by certain drugs and heavy metals. Having a strong antioxidant effect, silymarin increases immunity by fighting free radicals that multiply with age. It has a tissue regenerative effect on fatty liver. It activates protein synthesis and supports the formation of new liver cells.
- ✓ Cynara scolymus (artichoke extract) improves liver health. Thanks to the vitamins and minerals in its content, it protects the liver from damage and supports the development of new tissues. Since it contains plenty of vitamins A and B, it prevents arterial calcification and relieves gallbladder disorders. Regular consumption of artichoke extract has a positive effect on cholesterol levels, liver health, indigestion and blood sugar.
- ✓ Grape Skin Extract is a kind of antioxidant. It protects the body from internal and external free oxygen radicals. Strengthens the veins, helps to treat vascular diseases. It regulates blood and lymph circulation. It is good for skin diseases, increases the effect of vitamin C. It also helps to clean the blood and detoxify the liver.
- ✓ Thanks to Vitamin B4, betaine, phospholipid, organic selenium and powerful vitamins and provitamins, it supports the liver and its metabolism and helps to protect it from possible liver disorders.

Causes of Liver Disorders;

The liver is an important organ with many functions, such as the digestion and transformation of nutrients, the removal of toxic substances from the blood, as well as the storage of vitamins and minerals. The liver is responsible for removing many different substances from the body, so it is vulnerable to damage from many different sources. Liver disease results in inflammation known as hepatitis. If this disease is not treated, it can lead to loss of function as healthy liver cells are replaced by damaged tissues. Diseases in other parts of the body can also negatively affect liver function.

Major Factors Causing Liver Disorders;

Viral and bacterial infections, toxic wastes eaten by our little friends, heart diseases or some congenital diseases, deterioration of blood flow to the liver, fatty liver are problems that cause liver diseases.

These are not the only causes of liver disorders, age-related liver failure is more common in older cats and dogs. In some of the dog and cat breeds (Doberman, white terrier, etc.), (Scottish Fold, British Shorthair, Siamese, etc.) a predisposition to liver disorders is seen as a breed characteristic.

Some antibiotics, analgesics, chemotherapy and some anesthetic drugs and some infectious diseases such as Leptospirosis are among the causes of liver failure.

Symptoms of Liver Disorders;

- ✓ Decreased appetite
- ✓ Diarrhea and weight loss
- ✓ Vomiting
- ✓ Lethargy, weakness, aggressive demeanor
- ✓ Bruising or bleeding of the gums
- ✓ Yellow skin, jaundice in the urine and gums
- ✓ Water collected in the abdomen and swelling of the abdomen

Hepavela Component

Active Ingredients	Name of the additive	Inclusion level, units (in each 1 g)	
Natural products – botanically defined:			
Silybum marianum	Silybum marianum (L.) Gaertn.=Carduus marianus L. : Milk thistle extract CoE 551 / Milk thistle tincture CoE 551	100	mg
Cynara scolymus	Cynara scolymus L.: Artichoke extract CoE 565 / Artichoke tincture CoE 565	100	mg
Grape Skin Extract	Grape skin extract CoE 485	40	mg
Vitamins, provitamins and chemically well-defined substances having a similar effect:			
Choline	Choline chloride (60%)	100	mg
Betaine	Betaine anhydrous (99%)	200	mg
Technological feed additives: Emulsifiers			
Phospholipids	60% Lecithins	200	mg
Function Group: Compounds of trace elements			
Organic selenium	Zinc-L-selenomethionine (2000ppm)	20	mg
Carrier: Milk products and products derived thereof			
Milk powder	Skimmed milk powder	is completed to 1 g	

Usage and Dosage

	first 3 months	3 -6 months	Adult
Cats	0,5 g	1 g	1 g
Dogs	1 g	2 g / 10 kg	2 g / 10 kg

2 g/day is used for every 10 kg of body weight.

Packaging

30 tablets for dogs
20 sachets for cats

Storage Conditions: It should be stored in its original packaging in a closed, dry, cool and direct sunlight-free environment. The shelf life guaranteed in this way is 24 months from the date of manufacture. It should be used as soon as possible after opening. Do not use it without consulting your veterinarian. Please keep it out of reach of children

This is not a drug. It is a food additive used in the feeding of cats, dogs and other pet group animals.
